

High Temperature Chain Oil LFC 42220 HT

ELKALUB LFC 42220 HT is a synthetic high-temperature chain oil.
The oil can be used at temperatures up to 220 °C.
Due to the special formulation, the chain oil evaporates very slowly and shows a low tendency to coking. This allows economical use and extended lubrication and cleaning intervals.
In the case of chains that are operated permanently at a very high temperature level, the use of automatic lubrication devices is advantageous.
Typical applications of **ELKALUB LFC 42220 HT** are chains in shrink tunnels or in drying units of painting plants.
ELKALUB LFC 42220 HT is NSF H1 registrable and therefore suitable for use in food or related industries (pharmaceuticals, animal feed, food packaging).
