

Solvent and cleaner for PFPE lubricants LFC 500

ELKALUB LFC 500 is a solvent and cleaner for polyfluoropolyether-based (PFPE) lubricants. The product is used to pre-clean components which are subsequently lubricated with PFPE lubricant. Pre-cleaning improves the PFPE lubricants' perfect adhesion and is therefore recommended before initial application or re-lubrication. Due to ELKALUB LFC 500's high levels of solvency and capability, the product is ideally suited for removing used PFPE greases. The product is volatile. A quick processing and the corresponding preparation is recommended for economic and effective use.

Base oil

PFPE

Operating temperature

-40 °C to 50 °C

Functionality

- rinsing & cleaning

Packaging

- 1 l can
- 50 ml bottle

Industry

- automotive
- power tools
- drive technology
