

Away with the old brush! ELKALUB Brush Can

The clean solution for assembly applications in industry and food processing

- › easy to handle, clean, economical
- › precise dosing with one hand
- › no propellant – simplifies transport and storage
- › thread also fits common silicone cartridge nozzles

ELKALUB greases available in the brush can:

Product	NSF H1*	Application
ELKALUB GLS 361/N1	✓	Mounting grease, especially to avoid tribocorrosion and fretting, prevent thread galling of stainless steel screw connections
ELKALUB GLS 794/N2	✓	Silicone grease for mounting applications und for the lubrication of sliding movements in fittings, valves, taps
ELKALUB GLS 886	✓	Polyglycol oil based grease for mounting applications with seals, profiles, O-rings or tubes made of EPDM (e.g. brake and cooling systems of cars, glass installations)
ELKALUB GLS 993 H1	✓	Assembly grease for the food industry, sliding agent for fittings and valves, silicone-free mould release agent
ELKALUB 22103	(✓)	Polyglycol-based assembly paste, against fretting corrosion and tribocorrosion, Stuck components (e.g. shaft-hub connections) can be reliably disassembled.
ELKALUB VP 910		Wheel hub paste for the protection of wheel hubs, rim flanks and centering rings, enables easier dismantling, temperature stable up to 1200 °C
ELKALUB VP 924		General mounting grease based on mineral oil for the lubrication of sliding movements, also suited as battery terminal grease

* NSF H1-registered lubricants are suitable for use in the food industry.
